SUMMARY

Highly analytical Mathematics graduate with hands-on experience in data cleaning, performance analysis, and dashboard development using Excel, Power BI, and SQL. Proven ability to transform complex datasets into clear, actionable insights as demonstrated through a recent capstone project that delivered data-driven findings and strategic recommendations, improving analytical efficiency by 30%. Detail-oriented and results-driven, with strong communication skills and a track record of delivering structured reports and impactful solutions across dynamic organizations.

EXPERIENCE

Administrative Assistant & Data Analyst Support | NYSC

Al-Hikmah University, Kwara State

2025- 2026

- Managed and validated student academic records, ensuring 100% data integrity across the General Studies Unit.
- Conducted performance analysis using Excel (VLOOKUP, XLOOKUP, FIND) to track trends and generate structured reports for academic administration and senior stakeholders.
- Built charts and visual dashboards to communicate student performance data clearly and concisely to management.
- Supported documentation, compliance, and administrative reporting processes within a regulated institutional environment.

Camp Data Analyst (Volunteer) | NYSC Orientation Camp.

2025

- Designed and administered surveys (paper-based & Google Forms) to collect structured data from over 200 corps members on camp activities, health, and environment.
- Compiled, cleaned, and analyzed survey datasets in Excel; documented findings in formal written reports.
- Identified behavioral trends and presented data-backed recommendations to support operational planning.

Sales & Finance Assistant

Oladepo Multiventures, Oyo State

2021 - 2022

- Managed transactions and maintained accurate daily financial records, supporting cash flow monitoring.
- Tracked sales figures and reconciled revenue data, building foundational skills in financial documentation and reporting.

EDUCATION

Mathematics Education (Second Class Upper)

University of Maiduguri

Maiduguri, Borno State.

Oct 2018 - Oct 2024

TECHNICAL SKILLS

- Data Analysis:** Data cleaning & Preparation, Exploratory Data Analysis,(EDA), Statistical Analysis, Data Visualization, Data Interpretation Reporting, Database Management.
- Programming Language:** Python, MySQL, MSSQL.
- TOOLS:** Excel (Power Query, Pivot Tables), PowerBI, Google sheets, Microsoft Office tools.

CERTIFICATION

Data Analytics Training Program,

Seeding Africa Program

2026

Data Analysis & Visualization with Excel

UniAthena

2025

Data Visualization with Power BI

Unithena

2025

Intermediate SQL (Statement of Accomplishment)

DataCamp

2025

Data Literacy Professional (Statement of Accomplishment)

DataCamp

2025

Soft Skills Certificate

Jobberman

2025

PERSONAL PROJECTS

Transaction Analysis Report.

- Analyzed over 1 million bank transactions totaling \$45.9M across 1,131 active clients and 2,858 active cards.
- Built an interactive dashboard tracking transaction flow by month, card type, merchant classification, and customer age group.
- Delivered 5 strategic recommendations including digital banking promotion, loyalty programs, and debtmanagement initiatives.

TOOLS: PowerBI, DAX, Power Query

HR Data Cleaning & Business Insight Analysis

- Cleaned and consolidated large HR datasets; built automated lookup tools and executive dashboards displaying headcount, salary trends, and KPIs.
- Produced a regional HR scorecard showing country-wise headcount and department-level averages to supportworkforce planning.

TOOLS: Excel, Power Query, PivotTables

Sales Performance Analysis

- Analyzed multi-period sales data; built interactive dashboards tracking revenue, transactions, and growth metrics across product categories and store locations.
- Delivered actionable product-level performance insights and strategic recommendations to support business decisions.

TOOLS: Power BI, DAX, Power Query

Student Academic Performance Analysis:

- Collaborated in a cross-functional team to collect, clean, and analyze educational data across two universities.
- Produced data visualizations and research-backed findings, strengthening skills in teamwork, analytical thinking,and stakeholder reporting.

TOOLS: Excel, Power BI, SQL (Group Project)

Carbon Dioxide Emissions and Economic Growth Across African Nations

Seeding Africa Data Analysis Track | FemTech Information Technology Institute | May 2026

- Conducted an end-to-end data analysis project investigating the relationship between carbon dioxide emissions and economic growth across 52 African countries using 1,248 observations spanning 24 years.
- Cleaned and processed a 50,192-row global dataset in Microsoft Excel, filtering to African countries and reducing to 17 analytically relevant variables.
- Wrote 13 structured SQL queries in Microsoft SQL Server to extract insights on top emitters, regional comparisons, decoupling countries, gas flaring, methane emissions and COVID-19 impact analysis.
- Performed statistical analysis in Python (Pandas, Seaborn, Scipy) including Pearson correlation ($r = 0.7712$, $p = 0.000000$), outlier detection using IQR method, and trend visualization across 10 professional charts.
- Built a 6-page interactive Power BI dashboard with African-themed design, star schema data model, DAX measures and real-time slicers for year, region and country.
- Key findings: Africa's top 10 emitters contribute only 3.27% of global CO2 despite 17% of world population; GDP grew significantly faster than CO2 confirming partial continental decoupling; Rwanda identified as Africa's most carbon efficient economy (emission intensity: 0.051).
- Generated evidence-based policy recommendations for governments, development agencies and climate financing bodies.

Tools: Microsoft Excel | SQL (Microsoft SQL Server) | Python | Microsoft Power BI.

Data Sources: Our World in Data | World Bank | International Energy Agency.

AWARDS & ACHIEVEMENTS

Best Tutor of the Year.

[Mathematical Association of Nigeria \(MAN\), Unimaid Chapter, 2023.](#)

2023

Scholarship Recipient

[Seeding Africa, 2026](#)

2026

Scholarship Recipient

[DataCamp, 2024 & DataKliq, 2024](#)

2026

Certificate of Excellence

[Mathematics Competition, 2nd Place, FILGS.](#)

2016
